Jatin Sharma

Computer Science @ UNSW | Aspiring Software Engineer | Full-Stack, Cloud & AI Engineering.
Sydney, New South Wales, Australia

Summary

I'm a Computer Science student at UNSW (graduating August 2026) with a passion for building scalable software and exploring the cutting edge tech of artificial intelligence. My technical foundation is rooted in full-stack development (React, TypeScript, Node.js) and cloud infrastructure, backed by foundational certifications in AWS, Azure, and Google Cloud. Recently, I've been heavily focused on AI Engineering—specifically building Agentic AI systems and LLM-driven applications utilizing tools like the OpenAI SDK and LangGraph and APIs. I like solving complex problems and am constantly looking to bridge the gap between emerging AI technologies and practical, user-centric applications. I am actively seeking Graduate roles where I can contribute to impactful projects and continue growing alongside experienced engineering teams. Always open to connecting with professionals in the tech space!

Experience

Oppizi

9 months

Supervisor & Trainer

December 2025 - Present (6 months)

Sydney, NSW

Leading on-ground marketing operations and team development for major enterprise client campaigns.

- Supervised and trained new Brand Ambassadors to successfully run on-ground marketing campaigns.
- Oversaw campaign execution and operational logistics for major enterprise clients.
- Ensured quality control and adherence to client brand guidelines across all regional activations.

Offline Marketer

September 2025 - December 2025 (4 months)

Sydney, NSW

Executed targeted field marketing initiatives to increase brand penetration for leading food delivery platforms.

- Executed offline, on-ground marketing campaigns to drive brand awareness and customer acquisition for Uber Eats and DoorDash.
- Engaged directly with consumers to communicate value propositions and drive app downloads and promotional conversions.

Punjabi Society of UNSW

Marketing Sub-committee Member, Research Department

September 2025 - Present (9 months)

Sydney, NSW

Driving digital engagement and content strategy for university society initiatives.

- Manage and create engaging visual content and posts for the society's official Instagram handles.
- Conceptualise creative engagement ideas and coordinate research and content strategy for 10-week social media campaigns, including the "Word of the Week" initiative.
- Analyze engagement metrics to continuously refine and improve campaign messaging.

Independent

Software Engineering Student (Project)

September 2023 - Present (2 years 9 months)

Sydney, New South Wales, Australia

1. End-to-End Encrypted Chat (Python, asyncio, X25519, HKDF, XChaCha20-Poly1305): Double-Ratchet-style protocol (session setup, ratcheting, replay protection). Relay server + Rich-TUI client; verified CIA properties with logs/pcaps.
2. HTTP/1.1 Web Server (Python): persistent connections, correct status codes/MIME types/404s; simple benchmarking + concurrency tests; exact-output integration harness.
3. UDP Ping Client: RTT, loss, jitter; edge-case handling; CLI reports + plots (Wi-Fi vs hotspot).
4. DNS Digging Tool: iterative resolution (A/AAAA/NS), timeout/retry; query-path logs and validation.

5. PostgreSQL (PostgreSQL + PL/pgSQL): views, triggers, functions and handling the complex databases.

6. POSIX Shell Utilities (dash): 20+ scripts (backups, image conversions, timetable scraping) with strict shebangs, allowed tools, exit codes, spec-true outputs.

7. Led TypeScript/Node backend for a Kahoot-style quiz—built game flow, handled HTTP req/resp + status codes, integrated with frontend; shipped a stable, tested release.

8. Dungeon Mania: Refined original game code using OOP principles to enhance readability and maintainability. And applied clean code practices to ensure a more modular and efficient design.

Tech: Python, Java, C, SQL, Bash, Git, Linux, TCP/UDP/HTTP, PostgreSQL, Docker (basics), Wireshark.

Lenovo

Desktop Rollout Engineer

February 2026 - March 2026 (2 months)

Sydney, NSW

Facilitated enterprise hardware refresh cycles, ensuring minimal downtime and secure data transitions for end-users.

- Configured and deployed enterprise Lenovo workstations, ensuring optimal hardware, OS, and software setup.
- Executed system imaging, secure user data migration, and network connectivity verification to minimize user downtime during the hardware refresh.

Education

UNSW

Bachelor of Science - BSc, Computer Science(Major) · (September 2023 - August 2026)

UNSW

Marketing (Minor) · (September 2023 - August 2026)
